SUMMARY

Applied AI engineer with hands-on experience in LLM evaluation, data pipelines, and end-to-end AI application development. Combines AI fundamentals, engineering implementation, and cloud platform experience. Strong at partnering with technical teams and end users to translate ambiguous requirements into validation metrics, acceptance criteria, and working AI solutions.

EDUCATION

AWS Certified Solutions Architect - Professional (SAP-C02) — Expected 08/2026

University of California, Los Angeles, *Los Angeles, CA* — 09/2022 - 06/2024
Master of Applied Statistics and Data Science — GPA: 3.88/4.00

University of Illinois at Urbana-Champaign, *Urbana-Champaign, IL* — 08/2019 - 05/2022
Bachelor of Science in Statistics (minor in Mathematics) — GPA: 3.59/4.00

SKILLS

- **AI Product Delivery:** Requirement translation, stakeholder collaboration, workflow automation, domain validation, demo delivery
- **Applied AI Deployment:** LLM applications, multi-agent workflows, LangGraph/CrewAI, MCP-servers/APIs
- **Cloud Infra Experience**: AWS, ModelArts
- **AI Evaluation & Reliability:** Business-aligned metrics design, failure analysis, ablation studies
- **LLM Data & Training:** SFT/RL workflows, synthetic data pipelines, trajectory validation, data quality control
- **Engineering Skills:** Python, PyTorch, Git, Linux, Docker
- **Vibe-Coding Experience:** Claude Code, Codex

EMPLOYMENT

AI Engineer | Huawei, Shenzhen, China — 10/2024 - Present

- Led **business-oriented LLM benchmarking** across pre-training and post-training workflows, covering **60+ benchmark** datasets; built 0-to-1 ModelArts Cloud support for **inference resource orchestration, automated service deployment, and evaluation dashboard**, improving evaluation throughput by **3x** under fixed resource constraints.
- Built **SFT/RL data pipelines** for **agentic tool-call tasks**, integrating API/MCP-server environments, synthesizing multi-step trajectories, implementing automated quality validation for **tool-call correctness and task completion**; contributed **200K+ high-quality samples**, filtered/repaired **30% low-quality data**, and improved benchmark performance by **40%+**.
- Partnered with model, data, and evaluation teams to translate **model failure cases** into **actionable data requirements, validation rules, and iteration priorities** for large-scale LLM development.
- Accelerated engineering delivery by **70%** through **Claude Code/Codex-assisted** development workflows for evaluation infrastructure, data construction, and automation scripts.

AI/Data Analyst Intern | Palo Alto City Council (Office of Greg Tanaka), Palo Alto, CA — 03/2024 - 07/2024

- Partnered with frontend engineers and end users to **define** requirements and **translate** civic information-access needs into **production-ready assistant features.**
- Built a backend for an AI assistant using a **LangGraph-based agent architecture**; designed **prompt workflows**, integrated **conversational memory**, and developed **20+ custom LangChain-compatible tools**, exposing agent through FastAPI API.
- Increased civic email response throughput **from 5 to 30 emails/hour** with chatbot-assisted drafting while **maintaining a 90% content acceptance rate**; reduced council voting analysis time **from 1 week to 2 days** through chatbot-analysis and modeling.

AI Data Intern | TCL, Shanghai, China — 08/2023 - 09/2023

- Prepared an **IoT smart-assistant demo** by aligning algorithm engineers and users on model capabilities, limitations, and smart-device control expectations.
- Created **40+ internal evaluation datasets** and defined acceptance criteria for IoT assistant demo readiness, covering **latency**, **document-reading/content-extraction accuracy,** and **overall task completion rate**.
- Gathered **10+ high-risk edge cases** from client and domain-expert feedback to refine evaluation coverage and strengthen reusable LLM evaluation pipelines for future IoT assistant demos and customer deployments.
